

# LEVERAGE THE POWER OF IATF-16949 WITH ASQ

## ASQ's Internal Auditor Training for Automotive Industry

21<sup>st</sup>-22<sup>nd</sup> February, 2019/ April 2019 | New Delhi

### Training Objective:

IATF 16949 is a technical specification for the design and development of automotive-related products. This standard defines the quality management system requirements and is applied throughout the automotive supply chain.

ASQ India conducts 2-day Internal Auditor Training IATF 16949:2016. The training equips participants with the necessary auditing skills for IATF 16949:2016 and ISO 9001:2015 standard. Through classroom teaching, open discussions, group exercises and case studies the course teaches how to interpret the QMS requirements and apply them to specific work situation. The training has been designed to provide the participants with the ability to plan, manage and lead an audit based on IATF 16949 by faculty members with rich industry experience.

### Training Content:

Understand ISO 9001 and IATF 16949  
Plan successful audits to the IATF 16949:2016 QMS.  
Analyze audit results.  
Risk based thinking.  
Describe the conformity assessment process.  
Closing of non-conformity  
Understand roles and responsibilities of audit participants.  
Evaluate QMS documentation.

### Who should attend:

- Anyone interested in the requirements of the IATF16949 standard, and how to interpret them.
- Those moving their organizations toward IATF 16949 registration.
- Anyone responsible for leading an audit — quality directors, managers, engineers, auditors, ISO coordinators.
