ABOUT THE PROGRAM

Cybersecurity & ISO 27001-Information Security Management System risk management is the process of identifying an organization's assets, evaluating security measures, and implementing solutions to mitigate security risks. It is critical that all types of assets are protected including manpower, infrastructure and digital.

Risk Assessment: A critical phase that involves evaluating the likelihood and impact of potential risks to an organization's information assets.

Cybersecurity Awareness: Involves keeping the organization informed of the importance of cybersecurity and the responsibility of everyone to practice safe and secure operations.

Information Security Management System, ISO 27001: A globally recognized standard for information security management systems (ISMS) that provides a systematic approach to managing sensitive company information.

OUR SPEAKER

Virat Dhebar

*Cybersecurity & ISO 27001
Lead Auditor & Trainer*

“Virat has over 30 years of professional experience in management systems auditing and training in all types of industries including software, IT Service, automotive, pharmaceuticals, aviation, and telecom, also leading the Business Units in TUV SUD South Asia as Assistant VP of Corporate Training and Third-Party Auditing globally. His accomplishments include hundreds of audits in several countries as he is a registered Lead Auditor for ISO 9001, ISO 27001, Virat holds many certifications; CPRE, PCI-DSS, ITIL – FND, and CISP”

This month's symposium, titled “**CYBER SECURITY & INFORMATION SECURITY MANAGEMENT SYSTEM ISO/IEC 27001**” focuses on protecting systems, networks and data from unauthorized access, attacks or damage.

The session includes:

Expert Talk: A 60-minute-deep dive where the speaker will explore about how the Cyber Security & ISMS is managing sensitive company information so that it remains secure. It Ensures confidentiality, integrity and availability (CIA) of information.

Q&A - 30 minutes
